Key Differences	Blue powder-coated frame with flip-back, padded desk-length arms and nylon upholstery that is durable, lightweight and attractive while easy to clean. Comes with swing-away footrests or elevating leg rests and calf strap.	Powder-coated silver vein finish, this wheelchair features urethane tires, push to lock wheels and nylon upholstery that is lightweight and easy to clean. Along with folding back-canes for transport and storage.	Powder-coated silver vein finish, this wheelchair features 8" front casters that are adjustable in three positions, urethane tires, push to lock brakes and embossed vinyl upholstery that is durable, lightweight and easy to clean.	Powder-coated silver vein finish, this wheelchair has a hydraulic reclining mechanism allowing for infinite adjustment up to 180 degrees. Arms have support extensions for reclining position. 8" front casters and precision sealed wheel bearings to ensure long lasting reliability. Comes standard with anti tippers and swing-away elevating leg rests.	Powder-coated silver vein finish, this wheelchair has built-in seat rail extensions and extendable upholstery easily adjust seat depth from 16" to 18". Composite, mag style wheels are light weight and maintenance free. Comes with swing-away footrests or elevating leg rests with tool-free adjustable length riggings.	Weights 34 lbs. or less when properly equipped in the basic configuration (Excluding front rigging). Aluminum and Carbon steel blended frame with combination powder coated and silver vein finish is attractive, chip resistant and easy-to-maintain. 3 position quick release rear axles mounted on composite mag-style wheels with composite hand rims are lightweight and maintenance free.	Weights under 32 lbs. (excluding front rigging). Carbon steel black powder-coated frame double coated for an attractive, chip-proof, maintainable finish. Composite mag-style wheels with aluminum hand rims are lightweight and maintenance free. Dual axle provides easy transition of seat height to hemi level.	Weights under 35 lbs. in basic configuration (excluding front rigging). All-aluminum frame, dual axle allows for multiple seat-to-floor height positions. Adjustable angle back easily adjusts from 5° to 20°. Adjustable height back adjusts from 17" to 19" in 1" increments, adaptable for individual patient needs. Adjustable angle caster forks have three height adjustments and angle adjustability. Tool-free adjustable swing-away footrests also feature easy-to-access release handles. Urethane rear tires and casters offer superior performance, smoother ride and are lightweight. Adjustable anti-tipper with flip-up wheels never needs to be removed.	Double-coated chrome carbon steel frame for maximum durability. State-of-the art hydraulic reclining mechanism. Backrest reclines from 90° to 180°. Padded flip-back detachable desk armrests. Composite lightweight 24" mag-style rear wheels with urethane tires and 6" front rubber tires. Offset rear wheel position provides additional stability and evenly distributes users weight in all reclining positions.	Carbon steel frame with double-coated chrome for an attractive, chip-proof, maintainable finish. Hydraulic reclining mechanism allows for adjustments up to 180°. Spreader bar acts as a back stabilizer and a convenient push handle for the attendant. Offset rear wheel position adds additional stability and equally distributes the patients weight while in the various reclining positions. Built-in seat rail extension and extendable upholstery easily adjusts seat depth from 16" or 18".	Ultra-light, weighs less than 27 lbs. Forward folding back to reduce size. Multi-position back can adjust 15°. Quick-release rear wheels, semi-pneumatic tires on a 24" spoke wheel provide a smooth, true roll. 3" of depth adjustment in the overall wheelbase. Front casters are angle adjustable and height adjustable in three positions. Armrest can be flipped allowing 2" width adjustment.

LEGEND

GOOD ★
Good models are the base within the class, comparable to the competition of the same level. These meet the basic requirements with less refinements and minimal extras vs. the “BETTER” and “BEST” classifications. They tend to be entry level in the market with good value.

BETTER ★★
Mid-level models within the class, offer more features and benefits to give the end user a better user experience. These tend to be lighter weight than the good models and have more options available. They may have a higher user weight limit as well.

BEST ★★★
Best models combine similar design features from our “Good” and “Better” models but offer additional features that pushes them to the top ranking. They may be very light or could come with more options such as anti tippers or flip back arms included. They tend to be made from lighter materials without compromising strength to give the end user the experience they are looking for.
